

Application for Temporary Power

I, _____ do hereby apply for temporary use of the permanent _____
power
Owner/General Contractor (size of service)
system to the building located at

(address of site)

The use of the system before final inspection is anticipated to be _____ days or less. The temporary use of the system is necessary to operate the HVAC and to provide lighting for the completion of the finish work. Only those circuits that are necessary and/or have been inspected and approved by the electrician and building inspector will be energized. Any 125v single-phase circuits temporarily energized for construction purposes will be ground fault interrupt protected, with the exception of lighting circuits in metal conduit.

The building will be constantly supervised or will be securely locked when it is not supervised. The electrician, HVAC and plumbing contractors are ready for the system to be energized as attested below.

Owner/ General Contractor

As electrical contractor, I hereby certify that the building located at

_____ is ready _____ is not ready for power to the _____ amp service. Branch circuits
(initial) (initial)
will be energized as stated above.

Electrical Contractor

As HVAC contractor I hereby certify that the HVAC equipment installed in the building located at
_____ is ready _____ is not ready for power
