COMMENTS:										
ADA Requirements are lacking in Shelby										
Major streets going to schools - many lack sidewalks, no safe for most children to walk to school yet we want our children to be more physically active										
Very interested in this as someone who exercises frequently. Greenways, pedestrian-friendly routes are imperative in our town. People need to feel										
connected to the different agencies like City Park, YMCA, etc.										
There are more important things to focus on other than sidewalks at the moment.										
Shelby is in need of some walking paths and they would be well used and appreciated by the community.										
Hanging tree limbs and uncleaned sidewalks are biggest concern										
Really need public transportation for those of us who cannot drive any longer - it's a real problem										
Like to see designated walking trail in Shelby										
Lighting on Hillcrest Dr. improvements										
Sidewalks are in good condition with mostly limbs and trash on sidewalks.										
S. Washington toward Hwy 74 -sidewalk runs out										
Walk more if not so dangerous										
Population ages, walking more important to good health										
Broken sidewalks are a real concern										
Uptown beautiful area to walk, but dangerous crossing intersections due to fast traffic										
Walk more if more sidewalks and paths available										
Very unsafe to walk to post office due to speeding vehicles, need crosswalks										
Prefer walking at the Mall										
Quit walking due to speeding traffic										
Adding bike lanes										
Sidewalks needed on Wyke Rd. to Jefferson Elementary School and to the YMCA.										
Need speed bumps on Peach St. and Forest Hill to slow traffic; too dangerous to walk.										
Sidewalks need to be outfitted with wheel chair access										
Need raised walkways across Hwy. 74 - 3										
Speed limits need to be lowered and enforced in neighborhoods - 16										
Better timed stop lights to allow elderly and slow walkers time to cross										
Don't need anymore sidewalks/walking areas, need to concentrate on crime										
Build pond/lake in city with walking paths around it.										

Disturbed by the looks of the curbs and sidewalks in the City overgrown with grass/weeds									
Having walking & biking trails will boost the tourist economy and make Shelby more family friendly, promote healthier lifestyle									
Traffic lights should be synchronized and add speed detector lights									
Sidwalks need to be more wheel chair friendly
