

City of Shelby

Electric Service Installation Provisions

I, _____, have requested that the City of Shelby install above ground or underground electric service, conductors and or poles at my home/business located at _____ . In making this request, I agree to the following provisions:

1. While the City is responsible for locating publicly owned underground utility lines (telephone, catv, gas), I am responsible for identifying for the City or its agent the correct location of all underground objects that might be damaged by or cause damage to the City's equipment or its contractor's equipment in the process of installation. Underground objects include, but are not limited to: **septic tanks, drain lines, drain fields, water lines, irrigation lines and electrical lines not owned by the City.**
2. Once I have physically marked the underground objects, within + or - 30 inches, using paint, flags or stakes, the City or its contractor will assume responsibility for avoiding damage to said objects.
3. I assume full responsibility for any damage to underground objects caused by my failure to notify or incorrectly notify the City of the location of the underground objects.
4. The City or its contractor will assume responsibility for performing said installation in a professional manner by avoiding damage to obvious above ground objects such as curbs, gutters, shrubbery, sidewalks and buildings.
5. I understand the specific route of the proposed above ground or underground conductors and location of poles and/or apparatus as described by the City representative.
6. In the course of installing underground lines and equipment in areas with landscape trees, there is the probability of some root damage and I will not hold the City or its contractor responsible for damage to or the health of any trees.
7. Equipment tracks and ground disturbance will result from the use of equipment necessary for the installation of above ground and underground facilities.
8. The City or its contractor **will not** be responsible for reseeding lawns or replacing gravel in the area(s) disturbed due to the installation of poles, apparatus (such as transformers or pedestals) or underground facilities.
9. I may be required to pay a contribution in aid of construction if rock or other adverse conditions are encountered.
10. To meet National Electric Safety Codes, work site grading and landscaping must be _____ at final grade or _____ within 6 inches of final grade (City representative to initial appropriate item) before installation of underground facilities.
11. These provisions have been explained to me and I have received a copy of this document.
