City Park Needs Your Advice

City Park Golf Course Alternative Use Master Plan Public Workshop

The City of Shelby would like your input to help determining the “possible” future alternative recreational uses for the existing city golf course property at City Park. The City Council has instructed staff to look into other alternative uses for the golf course in addition to the development of operations improvement plan intended to increase play and revenue at the golf course. This workshop is to obtain ideas for NEW recreation programs and active and passive recreational amenities the community would like to see at City Park. Your input will assist City Council in making a decisions to most benefit the community.
