

CONDITIONS

Sewer service billing for customers who receive all water used from the City water supply system, is normally based on the entire amount of water metered and delivered by the City.

A customer who uses water received from sources other than the City water supply system and which water is discharged into the City sewer system, may be required to install and maintain, without expense to the City of Shelby, an acceptable device, or devices, for measuring the quantity of water received. The customer will pay a sewer service charge for such water discharged into the City sewer system, as though all such water had been received from the City water supply system.

In the event that a person or corporation discharging industrial wastes into the City sanitary sewer system produces evidence to the City Manager that more than 10% of the total annual volume of water used for all purposes does not reach the City sanitary sewer, an estimated percentage of total water consumption to be used in computing charges may be agreed upon between the City Manager and the persons discharging industrial wastes into said sewer.

A full sewer service charge will be made for water used to fill swimming pools, wading pools, and storage containers; unless such use is determined, at the time of delivery, by a measuring device other than the installed property water meter.

The Code of Ordinances of the City of Shelby, Chapter 44 Article IV, Sections 44-121 through 44-230, covers restrictions on the discharge of wastes into the City sewer system and surcharge(s) for the treatment of wastes which are potentially harmful to the system and/or involve extra processing costs.

In existing service where one meter serves more than one consumption unit, each unit will be considered to carry one customer charge per billing period, regardless of individual or aggregate consumption.
